

RRSH
RAPID RESPONSES TO
STEROID HORMONES

**13th International Meeting
on Rapid Responses to Steroid Hormones
Paris - 20/23 September 2022**

CHAIRS : YVES JACQUOT (PARIS) AND MATTHIAS BARTON (ZÜRICH)

THE 2022 EDITION

The 13th International Meeting on the Rapid Responses to Steroid Hormones (RRSH 2022) will be held from Tuesday, September 20, to Friday, September 23, 2022 at the Sorbonne, Paris (France).

RRSH is an **international biannual biomedical conference** organized by the *International Committee on Rapid Responses to Steroid Hormones (ICRRSH)* that explores, presents, and discusses advances in steroid hormone functions in biology and medicine. The most recent, cutting-edge developments concerning both rapid and long-term actions of steroids and steroid antagonists in the fields of biology, chemistry, pharmacology, medicine, oncology, and endocrinology will be presented.

The meeting marks the 25th anniversary of the conference which will be celebrated with a special gala evening at the Musée d'Orsay on the Left Bank of the Seine River.

Topics:

1. Steroid receptors and breast cancer
2. Vitamin D and Glucocorticoid receptor
3. Steroid functions in endocrinology and metabolism
4. Physiology and cellular functions of steroid hormones
5. Pharmacological targeting of steroid receptors
6. Steroid hormones and COVID-19
7. Steroid hormone actions in the brain
8. New roles of GPCRs in steroid signaling
9. Mineralocorticoid receptor in health and disease
10. Cardiovascular physiology and disease
11. Translational and clinical aspects of steroid receptor signaling

Important dates:

Opening of registration: 1st April 2022

Opening of abstract submission: 15th April 2022

Deadline for abstract submission: 15th July 2022
